**FRONT SIDE**

**BACK SIDE**

*Hassle free cord exits the back of the hat so it's easy to manage*

*Compact-size removable headphone speakers deliver superior sound quality*

**TOOKS HATS YOU CAN HEAR**

HEY, WHAT'S THIS "TOOK" THING? If you're wondering how a Took (pronounced like "two") got its name, it comes from the French-Canadian word for a beanie—"Touque" became "Tooks". So much cooler, eh?

**Compact-size speakers provide superior sound quality!**

Frequency range: 20Hz-20KHz  
Impedance: 32 ohms (at 1 KHz)  
Max input power: 40 mW  
Mean sound pressure: 112 dB/mW  
Input plug: 3.5 mm, right angle  
Cable length: 48 in.

**To insert speakers:**  
Turn hat inside out. Locate the 2" vertical slit and the 0.5" horizontal slit at the rear of the hat. Insert speakers through the vertical slit. Follow LR markings on speakers to position each speaker at left and right sides within the hat, making sure silver sides face outward. Push stereo jack into large slit and out through small slit, pushing out remaining cord.

**To remove speakers:**  
Turn hat inside out. Pull cord up through small slit, and remove speakers and cord through the large slit.

**LOOK FOR OTHER ROCKIN' STYLES!**

TOOKS headphones have a standard 3.5mm plug commonly used for audio devices. For devices using a smaller 2.5mm jack, you can purchase a 3.5mm to 2.5mm adaptor online at [Tookshats.com](http://Tookshats.com)

STYLE: TOOKS-BRIGADE

CARE INSTRUCTIONS: Machine wash cold, lay flat to dry. IMPORTANT: The headphones are not waterproof and should always be removed before washing the hat.
